## GENERAL GUIDELINES

1. The numbers used are based on the Berkeley Public Library's catalog which is accessible on-line.
2. Simplify whenever possible (i.e. put garden books about other countries under continent instead of individual country; put all the "bug" books together, etc.) This has been done to avoid having to assign long decimal numbers.
3. For flowers and types of plants, if there are more than four books in the collection, instead of entering the call number with the author under it, put it under the subject (this will keep all like materials together on the shelf).
